

FUTURE F TYPE?

By Neville Barlow

This is not a real Car!!!

However Automotive manipulator Theophilus Chin thinks this might be the answer to the F Type's small boot space. He says Jaguar should make an F Type Sportsbrake, back in 1966 Jaguar lengthened the E Type, put in 2 back seats and called it a 2 plus 2. Perhaps bigger seats would be the thing!

Rumours abound about the next F Type. We have seen sketches of a so called J Type with an engine amid ships. A genuine 4 seater would nicely replace the discontinued XK which is much sought after by many Jaguar followers.
